

Wet Rolled Wipes In Canisters Complete TurnKey Lines

Installation, Service, Parts, Delivery & Training, under ONE umbrella

- As little as 2 operators from the master roll to a canister packed in a box
- Strikingly low changeover downtime, raw materials waste and space requirement design, leading to substantial costs savings
- Throughputs offered in 60, 120 and 200ppm
- NOT just generic machines but equipment designed for the specific market needs of high quality Wipes Canisters production

We offer proven experience delivering full turnkey solutions to the following markets:

- Personal care
- Cosmetics
- Household
- Automotive
- Industrial
- Agricultural

"When it comes to packaging equipment finding everything you need with one reliable, experienced supplier can be challenging. Most vendors can only offer a few types of generic machinery forcing you to shop for potentially incompatible technologies from multiple sources. With Shemesh Automation, you get the most advanced round wipes packaging equipment in the world, as a turnkey system, from just one dedicated, experienced manufacturer. We have actually designed our wipes equipment with the specific needs of the rolled wipes market in mind and boast a proven track record of successfully delivering over 50 lines globally over the last decade - consistently learning, improving and challenging ourselves."

Shai Shemesh, CEO.

Explosion Proofed & Corrosion Proofed Equipment Upgrades

Corrosive or alcohol-based solutions dictate that your equipment is duly fitted to professionally handle these delicate environments. Years of experience in the field made it possible for us to tailor you the exact protection so your production is safe and stable, while your people and equipment are well protected, keeping your facility at the top of the range.

All of our machines are constructed using SST 304/316L, and are available with anti corrosive proprietary coating. As well as the machine base, all vital parts such as nozzles and pumps are also specially treated.

For more information, please contact your regional Shemesh Automation Representative.

BANNER Sensors

ANTI CORROSION

Built in ATEX rated commended ventilation systems for flammable fumes evacuation

EX Approved Components such as SIEMENS motors, BANNER Sensors and SIEMENS PLC and HMIs

The Value Proposition

1. Teaming up with the world's most advanced round wipes downstream equipment maker to expand knowhow, enhance production efficiency, lower costs per unit sold, raise output and product quality, thereby **improving market share and overall profit margins for the business.**
2. It is our belief that the suggested Line is the most advanced in the world today. In addition to **ultra low downtime, sanitary and materials waste control design**, some of the Line components like our flagship first-to-market vertical **SAS** for round wipes canisters stuffing, the special **FGW** no-drip, no - "nonwoven overflow" shower nozzles with a filling and portioning accuracy within $\pm 3\text{ml}(!)$ of volume, the **SEALPRO** linear cut & thermo seal methodology and the **CIW** no lids deformation mechanism are **unique in the industry**. These are **NOT generic machines** but were developed for the **specific market needs** required for **high quality rolled wipes in canisters production.**
3. SA boasts **unprecedented proven empirical experience** providing **one-stop-shop** turnkey Wipes Canister solutions for **converting, cans feeding, wipes stuffing, filling, sealing, capping, continuous labeling and case packing.** From the client's perspective, this means less responsibility questions, lower costs at the sale and after sale stages and **seamless, reliable, consistent and efficient operating standard.**
