

ATTILUS

NEW CONTINUOUS MOTION CAPPER FOR TRIGGERS, PUMPS, SCREW CAPS & MORE

Enables higher speeds and enhanced accuracy in automatic caps, pumps and triggers sorting and capping

THROUGHPUT

- Up to 80 products per minute

VERSATILE & ECONOMICAL

Different cap types and formats are changeable at the touch of a button!

- Almost eliminates the need for format parts
- Dramatically reduces downtime (under 20 minutes changeover)

ROBOTICS

- A **Robotic Sorter** based on **Delta Robot** and an advanced vision system allows the ATtilus to sort and orientate even the most complex screw, trigger and pump caps
- A pick & place **Cartesian Robotic Arm** (gantry two axis robot), which is **servo-controlled**, is used to track and deliver the caps to the bottles while in motion, ensuring smoother and faster production

QC

- Servo controlled torque QC and cap position QC

ADDITIONAL OPTIONS

- Vision QC system for cap position
- Fully automatic servo-controlled changeover - translates to under 5 minutes changeover time
- Bottle orientation for inclined neck bottles
- ATEX/EX Compliance
