First-to-market Jumbo Wipes Bagger from Shemesh offers manufacturers a sustainable solution

Building on the success of its CITADEL-R monobloc bagger for round refill and consumer wipes, global machinery manufacturer Shemesh Automation Wet Wipes is once again first to market with a ground-breaking offering for Jumbo Wipes makers.

Most industries are undergoing transformational change in the wake of COVID-19 coupled with increased concerns around climate change, and the nonwoven wipes sector is no different. In fact, Shemesh first developed the CITADEL series in response to two emerging industry trends.

First, wipes manufacturers are beginning to transition away from rigid packaging such as canisters and buckets towards flexible packaging. This not only means they use less plastic, but also flexible packs take up less space – allowing manufacturers to make savings on transport costs and reduce their carbon footprint.

Second, whilst the initial covid-related surge in demand for consumer wipes may have settled down post-pandemic, it's clear that the market for jumbo wipes in flexible packs, commonly used in hospitals and gyms, is still growing apace.

Meet CITADEL-J

Responding to this growing market trend and building on the successful launch of its CITADEL-R model, Shemesh has developed the perfect solution for manufacturers of wipes in flexible jumbo-sized bags who are looking to enhance their production with fast, space-saving automation. The CITADEL-J.

A stand-alone monobloc unit, the CITADEL-J automatically stuffs jumbo sized (typically in the 600 sheet-count to 1,200 count range) nonwoven rolls into premade bags, accurately fills them with liquid (typically 3 to 5 litres) while providing constant support beneath the heavy bag, seals the bags and then ejects the finished product at speeds of 10-15 packs per minute (depending on product-specific variables).

CITADEL-J is designed to connect seamlessly to existing slitter/rewinders, allowing manufacturers to benefit from complete A-Z hands-free operation.

Shemesh Automation CEO, Shai Shemesh explains that much like all the best products, CITADEL-J came by way of a genuine response to a real unmet market need: "CITADEL-J is a great example of a business listening to its customers and bringing to market a machine that really offers an answer to requirements that had been left unaddressed by the wider market for too long. Now, thanks to CITADEL-J, manufacturers of jumbo wipes in flexible packs have a cutting-edge automated solution that will allow them to make savings to their carbon footprint while enhancing production efficiencies - and their bottom line".

About Shemesh Automation:

With over 50 years' in the industry, Shemesh Automation is a global leader in the high-end packaging and assembly machinery and industrial automation appliances manufacturing arena. Currently under second-generation management, the family-owned business, supports over 1800 assets in over 50 countries around the world. Its nonwovens arm, Shemesh Automation Wet Wipes (www.sawetwipes.com) is a global pioneer in nonwovens downstream packaging equipment with cutting-edge technology positioned at the very forefront of the industry. Shemesh is represented in 13 countries around the world with offices in the US, UK, France and Israel. Its London-based office coordinates global ops and its Israeli office takes advantage of the incredible local engineering talent and innovation. Shemesh's unique combination of UK customer-centric service with an Israeli startup mentality to push the technical boundaries, plus the use of top-notch parts from German manufacturers has greatly contributed to its success. "We don't just see ourselves as a company which builds cutting-edge machinery, but instead we want to become your partner for a long and successful journey. As such, we pay particular attention to our after-sales to ensure we provide a premium service. "Let us build your vision" is not just our slogan. Simply put, this is what we do, day-in day-out" - Eli Shemesh, Founder.
